MONUMENT & GROUND SIGN PERMIT APPLICATION PACKAGE

(Monument & Ground Signs ONLY)

➢ “How to Obtain a Monument & Ground Sign Permit”

➢ Monument & Ground Sign Permit Application Form

➢ Existing Signage Removal Affidavit

➢ Monument & Ground Sign Permit General Information

➢ Building Permit Application (if required)
HOW TO OBTAIN A MONUMENT & GROUND SIGN PERMIT

*** KEEP FOR YOUR RECORDS ***

Step 1. **Verify Business Location is in the Snellville Municipal City Limits.** Verify the physical business location is in the municipal city limits of Snellville. Four different Postal Zip Codes (30017, 30039, 30052, and 30078) serve the greater Snellville and South Gwinnett area; however, they may not necessarily be located within the City limits. To verify that your business location is within the municipal city limits of Snellville, please review the City of Snellville Street Listing on the City’s website (www.snellville.org) or call the Department of Planning & Development 770.985.3514 to have your location confirmed. If the location is not within the Snellville City limits, you will most likely need to contact Gwinnett County Planning & Development 678. 518.6000.

Step 2. **Verify Zoning of Property.** Verify that the physical business location is properly zoned to allow the proposed use of the property. If the zoning for the business location does not permit the proposed use of the property, a Rezoning Amendment, Land Use Plan Amendment, or Conditional Use Permit would need to be applied for (by the property owner) and approved through a Public Hearing before the Mayor and Council. Please call the Department of Planning & Development 770.985.3514 to check the current Zoning District classification for the business location. You should review the Zoning Districts and permitted uses on the City’s website (www.snellville.org) to determine which Zoning Districts would permit the use of the proposed business.

Step 3. **Review Sign Ordinance.** Review the Snellville Zoning Ordinance, Article 12, Signs (www.snellville.org) to ensure compliance with the City’s Ordinance.

Step 4. **Obtain a Monument & Ground Sign Permit Application Form and information package.** These may be obtained by visiting the Department of Planning & Development, City of Snellville, City Hall, 2342 Oak Road, 2nd Floor, or by calling 770.985.3514, or printed from the City’s website (www.snellville.org).

Step 5. **Review the General Information Guidance Document (Page 7).** For general information and list of required sign, construction, and electrical details.

Step 6. **Complete the Monument & Ground Sign Permit Application Form,** attach the required:
   a) **Monument & Ground Sign Details** (see General Information below);
   b) **Illumination/Lighting Details** (see General Information below);
   c) **Monument & Ground Sign Site Location Plan** (with the sign location indicated and all road frontage(s), setbacks from R/W, and setbacks from top of curb or edge of pavement);
   d) **Photographs of all Existing Signage** (for the business, or property if a standalone business);
   e) **Building Permit Application** (if applicable); and
   f) $15.00 Review Fee.

Step 7. **Submit the Complete Application “Package”.** Typical office hours are 8:00 a.m. to 5:00 p.m. Monday through Friday, except holidays. The review and issuance of sign permits is a “Drop-Off Process” for the initial review. If a Building Permit is also required for the sign, structural and electrical drawings must be submitted, reviewed and approved by the Building Plan Review Unit prior to the issuance of the Building Permit. You may also submit your completed application and review fee remittance by U.S. Mail or Overnight Delivery. **We do not accept faxed or emailed applications.**

Step 8. **Application Review and Site Inspection.** Applicants will be notified within 15 business days following application submittal of permit approval or denial. Applications determined to be incomplete or that contain information that is determined to not be in conformance with the Snellville Zoning Ordinance, Article 12, Signs will be denied and will require a new and complete application re-submittal and $15.00 review fee. For any application denied, a written denial letter will be mailed, providing the reason(s) for denial.

Step 9. **Permit Pickup.** When contacted by Planning Department staff that the permit is ready for issuance, a return visit to Planning & Development Department is necessary. Remit the appropriate permit fees (cash, check, Visa, and MasterCard accepted).

Step 10. **Sign Order and Installation.** Upon receipt of a signed and approved Monument & Ground Sign Permit Application/Sign Location Plan (and Building Permit, if required), sign order may be placed with sign contractor and installation of sign is authorized. Signs installed without a valid signed and approved permit will require immediate removal by the property owner or business owner and be subject to three times the permit fees upon permitting.

**Inspections & Certificate of Completion.** If a Building Permit is required, electrical underground (if required), footing, electrical final and sign final inspections must be scheduled, successfully passed and a Certificate of Completion issued prior to use of the sign. Electrical contractors must submit their Subcontractor Affidavit form to Planning & Development at least 2-days prior to requesting electrical inspections. Inspections are requested by calling 770.985.3513.
MONUMENT & GROUND SIGN
PERMIT APPLICATION FORM

Please complete this application and submit with all necessary attachments as stated in the “Monument & Ground Sign Permit General Information.” Please type or print legibly using blue or black ink. Incomplete or illegible applications may be grounds for permit DENIAL.

Existing & Non-Conforming Sign Information

NO BUSINESS SHALL BE ALLOWED AN ADDITIONAL CONFORMING SIGN UNTIL IT HAS REMOVED ANY EXISTING NONCONFORMING SIGN.

➢ Are there any EXISTING Monument, Ground, or Wall Signs located on the property or building? □ No □ Yes
   If yes, what will happen with the existing signs?____________________________________________________
   If yes, are any of these signs NON-CONFORMING (as defined in the Sign Ordinance)? □ No □ Yes
   If yes, what will happen with these non-conforming signs?_____________________________________________
➢ If EXISTING Monument, Ground, or Wall Signs will be removed, □ check here and complete the attached “Existing Signage Removal Affidavit.”

Additional Sign Permit Requirements

➢ Monument Signs that REQUIRE both a Sign Location Permit AND Building Permit include (please check each):
   o Individual Signs that Exceed 32 Square Feet in Area? □ No □ Yes
   o Individual Signs that Exceed Six (6) Feet in Height Above Grade? □ No □ Yes
   o Signs that are Internally or Externally Illuminated? □ No □ Yes

➢ Monument/Ground Signs that REQUIRE Design by a Georgia Registered Professional Engineer (please check):
   o Signs that EXCEED Twelve (12) Feet in Height Above Grade? □ No □ Yes
   o Signs with supporting structures that EXCEED 50 square feet in area? □ No □ Yes

Sign Ordinance Definitions & Information

Freestanding Sign. A permanent sign, which lacks a decorative base, supported by one or more upright poles, columns, or braces placed in the ground. Shall not exceed six (6) sq. ft. in area, not to exceed three (3) feet in height, including support mechanism. The maximum number of signs permitted is two (2) per curb cut or two (2) per road frontage whichever is greater. Signs must be located out of the right-of-way or at least ten (10) feet from the back of curb or edge of pavement of the adjacent street, whichever is greater.

Monument Sign. A permanent ground sign designed so the base of the sign face is flush with the supporting base and the supporting base is flush with the ground. Sign shall include a solid, decorative base and may include a decorative frame. The base shall be at least as wide as the sign and/or frame upon it and a minimum of two (2) feet in height. Decorative base and frame materials include stone, brick, E.I.F.S. or stucco. No support posts shall be exposed. Electrical disconnect and/or meter base shall not be visible from the public right-of-way. Allowed one (1) per road frontage. Maximum square footage (SF) of sign is based upon 0.50 SF per one (1) foot of road frontage or 64 sq. ft. whichever is larger, up to a maximum of 225 sq. ft. Signs greater than five (5) feet tall shall be setback ten (10) feet from the right-of-way. Signs greater than ten (10) feet tall shall be setback fifteen (15) feet from the public right-of-way. Base shall be constructed of natural brick or stone (not painted or stained); or E.I.F.S./stucco painted or stained using colors from Sec. 7.7(3)(D). Monument sign shall include the numeric street address of the property upon which it is located. The numbers used to identify the address shall be no less than five (5) inches in height and no more than nine (9) inches in height.

Sign Area. The entire area within a continuous perimeter, enclosing the extreme limits of the sign structure, NOT to include the first 24” of the base height of a monument sign.
Electronic Message Board Sign

➢ Electronic messaging may be an element of a monument or free standing sign but shall not exceed fifty percent (50%) of the total sign area.

➢ Electronic messaging signs are permitted in the following commercial zoning districts: CI, OP, BN, BG, HSB and TC-MU. Within residentially zoned districts with an approved Conditional Use Permit or Special Use permit.

➢ Electronic message boards shall meet the size and placement requirements of the Sign Ordinance with the exception that electronic message boards shall not be allowed as off premises advertising devices.

☐ CHECK HERE if this application includes electronic messaging in the sign design and submit a completed Electronic Message Board Sign Permit Application.

Property Owner / Business Owner / Owner’s Agent Signature

I hereby certify that there are no existing signs except those indicated on this application or that any sign(s) not listed on this application will be removed before any new sign(s) are installed. I further certify that I am the owner or duly authorized agent of the owner for the placement, installation and/or maintenance of sign(s) hereunder. I further certify that all necessary building and/or electrical permits required for the installation of sign(s) will be obtained prior to installation. I understand that the Monument & Ground Sign Permit Application dated and signed by the Director of Planning and Development shall serve as the official Monument/Ground Sign Permit.

SIGNAGE REMOVAL AFFIDAVIT

This affidavit must be completed if existing signage must be removed in order to authorize any new signage. Please complete this affidavit, attach it to your Sign Location Permit application, and submit it to the Department of Planning & Development.

Project Name: _______________________________________________________________ Unit/Phase: _________

********************************************************* ACKNOWLEDGEMENT *********************************************************

The signers of this affidavit hereby acknowledge that any existing signs that must be removed to qualify for new or additional signage MUST be removed PRIOR to completion of new signage as authorized by the issuance of the Sign Location Permit.

Sign Contractor’s Signature Name: __________________________________________________________

Sign Contractor’s Printed Name: __________________________________________________________ Date: ___________
This document’s purpose is to provide general guidance in obtaining a Monument & Ground Sign Permit. The Department of Planning & Development is responsible for the review and issuance of all Sign Permits. Sign Permit processing is a “drop-off” process for the initial review. The following information is necessary to process each Monument/Ground Sign Permit application:

- **Application Form.** Complete a Monument & Ground Sign Permit application form. The property owner or owner’s authorized agent must sign the application form or a separate letter must be provided from the property owner or agent authorizing the sign installation. Submit the completed application form to the Department of Planning and Development for review. **Incomplete applications CANNOT be accepted for processing.**

- **Sign Location Permit Review Fee.** The $15.00 review fee (non-refundable) must accompany the application form (upon initial application submittal and again upon any subsequent re-submittals).

- **Other Sign Permits.** The following signage type requires submittal of a separate sign permit application:
  - Wall Sign
  - Canopy Sign
  - Interior Project Directional Sign
  - Window & Door Sign
  - Menu Board Sign
  - Electronic Message Board Sign
  - Awning Sign
  - Pre-Menu Board Sign
  - Entrance Sign

- **Site Location Plan & Property Survey.** Must accompany the application and include the following information:
  - The site plan and property survey information may be combined into a single plan sheet and drawn to scale;
  - The site plan must show the proposed sign location, limits of street right-of-way, driveway locations and parking spaces. The distance between the right-of-way and the proposed sign must be shown on the plan;
  - Provide current right-of-way information through a current property survey completed by a Georgia Registered Surveyor or through a plat copy. Combining of plats is permissible. For example, older plat indicates 30-feet from centerline as right-of-way. Georgia DOT has a plat indicating that 10-feet of additional right-of-way was acquired. Georgia DOT plat must show all new dimensions of new right-of-way. Label the new right-of-way line on the older plat (‘red-lining’ is permissible). Attach both plats together to serve as the site plan indicating current right-of-way information;
  - Indicate driveways and parking space locations on the plan. This ensures that the sign does not occupy or overhang required driveways and parking spaces;
  - Indicate drainage or sewer easements near the sign base (if any); and
  - Provide three (3) copies of the site location plan/property survey.

- **Monument & Ground Sign Details.** A drawing of the sign must accompany the application and must indicate the following information:
  - The dimensions of all signs and sign structures;
  - The total area of the sign in square feet;
  - Distance from the street right-of-way, top of curb, and edge of pavement;
  - Total sign height above ground level. If the proposed sign location is below street level and additional sign height is desired, the following additional information must be submitted: a) Cross-sectional information that indicates the sign’s location, ground elevations, street location and street elevations; b) Supporting information, as necessary, to verify topographic elevations. This may include plans certified by a registered surveyor or professional engineer;
  - Numeric street address of the property upon which the sign is located shall be attached to the sign. The numerals shall be no less than five (5) inches in height and no more than nine (9) inches in height.
  - Provide three (3) copies of the sign detail plans; and
  - If a Building Permit is required, in addition to a Sign Permit, approval by the Building Plan Review Section is required prior to issuance of a Sign Permit.
Illumination/Lighting Details. Details showing compliance with the illumination and lighting requirements must accompany the application and must demonstrate the following information:

- Internally illuminated signs shall not exceed twenty (20) foot candles of light at a distance of ten (10) feet from the structure;
- Externally illuminated signs shall be lighted so that lights are positioned in such a manner that light does not produce glare nor does it shine into the eyes of motorists or pedestrians so as to create a hazardous or dangerous condition;
- Externally illuminated signs shall have lights with directional cut-offs which do not allow the light source to be seen by passersby;
- All fixtures shall be ground mounted. No more than two (2) fixtures per side. No more than 2% of light may go above horizontal;

Building Permit (if required). Submit three (3) complete sets of drawings which clearly indicate the structural and electrical construction requirements for each proposed sign and at a minimum contain the following information:

- Drawings for each illuminated sign shall clearly indicate the electrical requirements including the size and location of the electrical disconnect, the type and size of wire, the conduit size and estimated load. Drawings shall also specify the name of a nationally recognized organization as applicable to the illuminated sign to be installed;
- Electrical installations shall meet the requirements of the NFPA National Electrical Code and must be performed by a Georgia Licensed electrician;
- The Georgia Licensed electrician (electrical subcontractor) must submit a completed Subcontractor Affidavit; provide a copy of their Business License; and provide a copy of their State of Georgia State Construction Industry Licensing Board Electrical Contractor License copy, to the Planning & Development Department prior to requesting an electrical inspection;
- Drawings for each sign structure shall clearly specify the required materials, sizes, and locations for all structural components. Complete details shall be provided that clearly indicates the required connections between all structural components including anchorage to the foundation. Details shall also indicate required attachments of sign cabinets to the supporting structure; and
- Sign foundation requirements shall be clearly indicated on the drawings including, but not limited to, footing size and reinforcement, 28-day compressive strength of concrete, anchor bolt size and embedment depth.

Signs Requiring Engineered Plans. Submit three (3) complete sets of design plans, each with original seal and signature by a Georgia Registered Professional Engineer, for signs that exceed twelve-feet (12’) in height above grade or signs with supporting structures, including monument signs, that exceed 50 square feet in area. Submitted design plans shall contain the following minimum design data in addition to the information required above for building permits:

- State on drawings that the design complies with the SBCCI Standard Building Code;
- State on drawings that the wind load design complies with ASCE 7 (Minimum Design Loads for Buildings and Other Structures);
- State on drawings the Basic Wind Speed (mph), Design Wind Pressure (psf), and Exposure Category (B or C);
- State on drawings the minimum required soil bearing capacity (psf); and
- State on drawings the structural material specifications (including but not limited to ASTM designation, yield strength (ksi), and material grade, if applicable.

Inspection Requirements. Drawings for sign structures that have been stamped/approved by the Building Official shall be kept readily accessible at the job site at all times during construction; and

- The building permit card shall be posted in the immediate vicinity of the proposed ground sign location;
- The Georgia Licensed electrician (electrical subcontractor) must submit a completed Subcontractor Affidavit; provide a copy of their Business License; and provide a copy of their State of Georgia State Construction Industry Licensing Board Electrical Contractor License copy, to the Planning & Development Department prior to requesting an electrical inspection;
- Each sign, for which a building permit has been issued, requires inspection by the building inspector during each of the following stages of construction:
  - A foundation inspection is performed after excavation and prior to concrete placement with steel reinforcement, anchor bolts, and structural posts in place;
  - An electrical inspection is performed only after the foundation has been inspected and approved by the City inspector; and
  - A final inspection is performed after completion of all construction and upon successful completion, a Certificate of Completion will be available for pickup the following business day.
- **Appeal/Administrative Review.** Any person aggrieved or affected by the decision of the Director of Planning and Development relating to the application of the Zoning Ordinance, may appeal to the Zoning Board of Appeals for relief or reconsideration within thirty (30) days from the date of the adverse determination by the Director of Planning and Development and/or Code Enforcement Officer.

- **Expiration Date.** A Sign Location Permit expires if construction of the sign has not been completed within six (6) months from the date of permit issuance.

As the property owner or authorized agent, I hereby apply for a permit to erect/alter and use the sign structure as described herein and/or shown on accompanying plans and specifications. If a site location plan is required, said structure will be located as shown on the site location plan. If the permit is granted, I shall construct and install same according to the sign location plan, structural and electrical drawings, national, state, and local building codes, and zoning ordinance of the City of Snellville. Further, I shall be responsible for complying with all required set backs. Electrical installations shall meet the requirements of the NFPA National Electrical Code and must be performed by a Georgia Licensed electrician. Electrical subcontractor shall submit a completed Subcontractor Affidavit to the City of Snellville Planning Department prior to making any electrical connections. Sign Contractor must hold a valid Occupational Tax Certificate (AKA "business License") and provide a copy at time of Building Permit application. I hereby certify that I am the property owner or the authorized agent of the property owner and that all information contained hereon is true and accurate.
